OROGERMINA

ORAL SPRAY
FOOD SUPPLEMENT

The presence of normal saprophytic bacterial flora in various districts of the body, including the oropharynx, is essential for the wellbeing of the entire organism. The presence and balance of these microorganisms are ensured by a varied and balanced diet and a healthy lifestyle. Dietary deficiencies, antibiotic treatments or environmental factors lead sometimes to a saprophyte deficit. In this case, those conditions, typical of the winter season, may arise in the pharyngo-tonsillar district.

Orogermina Oral Spray with Vitamin B6 and Vitamin B12, enriched with Streptococcus Salivarius 24 SMBc and Streptococcus Oralis 89a, is indicated to provide an additional supply of these elements in cases of deficiency and/or increased need, specifically:
- **Vitamins B6 and B12** contribute to the normal function of the immune system.
- **Streptococcus Salivarius 24 SMBc and Streptococcus Oralis 89a**, normal constituents of the pharyngeal microbiota, rebuild the physiological barrier of native saprophytes.
The intake of these substances may therefore be helpful in restoring normal physiology.

In cases of reduced dietary intake and/or increased need for the substances contained in Orogermina® and when it is appropriate to rebalance the oropharyngeal saprophytes for the wellbeing of the respiratory tract.

USAGE
The package consists of 2 bottles, 2 sachets and two nebulisers. It is recommended to assemble a single bottle at a time, using one bottle, one sachet and one nebuliser.

1. ASSEMBLING THE PRODUCT
- Cut the sachet along the dotted line, open the bottle and pour the content of the sachet into the bottle, taking care not to spill the content of the sachet.
- Close the bottle with the cap and shake vigorously.
- Open the bottle, screw in the nebulizer after removing the protective cap.

2. USING THE PRODUCT
- Shake well before each use.
- Before applying, spray several times to activate the nebulizer. Holding your head straight, apply the product into the pharynx (throat).
- Store in the refrigerator.
- It is suggested to keep the product at room temperature for about 15 minutes before application.
- The assembled bottle must be used within 15 days from the first application.

RECOMMENDED DOSAGE
Adults and children: it is recommended to apply 2 sprays (min. 4 x 10^9 CFU) once a day for 30 consecutive days, using both bottles, assembling the second one 15 days after the first one. It is recommended to repeat the treatment for at least 3 months or according to different medical advice.

WARNINGS
-The product is not intended as a substitute for a varied and balanced diet and healthy lifestyle.
- Do not use in case of hypersensitivity to one or more components.
- Do not exceed the recommended daily doses.
- Keep out the reach of children under 3 years of age.
- Do not store the intact product above 25°C.
- **Once assembled, store the product in the refrigerator (4°C).**
- The shelf life of the product, unassembled and correctly stored, is 24 months.
- Keep away from heat sources.
- Do not use the product after its expiry date.
- Do not dispose of the container in the environment after use.

PACK
2 bottles containing 10 ml of solution each.

2 sachets containing 1,15 g of lyophilized product each.
2 throat nebulizers.

INGREDIENTS
Composition of the sachet: Lyophilized Streptococcus salivarius 24SMBc and Streptococcus oralis 89a (min.125 x 10^9 CFU/g). Anti-caking agent: Corn Starch, Magnesium stearate.

Composition of the bottle: Hyaluronic Acid sodium salt, Vitamin B6 (Pyridoxine hydrochloride), Vitamin B12 (Cyanocobalamin). Sweetener: Fructose. pH regulator: Citric acid, Potassium citrate. Thickener: Carboxymethylcellulose. Fiordilatte flavour, Purified water.

Nutritional values	**Daily dose 2 puffs (0,33 ml)**	**%NRV***
Vitamin B6	0,70 mg	50%
Vitamin B12	2,5 µg	100%
S. salivarius 24SMBc + S.oralis 89a	≥ 4 BN CFU	

**NRV = Nutrient reference values*
